PROFESSIONAL SUMMARY

Backend Software Engineer with 1+ year of experience designing and operating REST APIs and high-volume data services on ASP.NET Core, SQL Server, and Microsoft Azure. Strong fundamentals in data structures, algorithms, and system design, with hands-on experience in stored procedure optimization, JWT/RBAC security, and building reliable, scalable backend services across C#, Python, Java, and JavaScript.

TECHNICAL SKILLS

Languages:	C#, Python, Java, JavaScript, SQL, HTML, CSS
Backend & APIs:	ASP.NET Core MVC/Web API, REST APIs, Node.js, Express.js, FastAPI, JWT & RBAC
Databases:	SQL Server (SSMS), MySQL, MongoDB, Firebase, SQLite, Stored Procedure Optimization
Cloud & DevOps:	Microsoft Azure (App Service, Blob Storage), Docker, Git, CI/CD, Google Cloud Vertex AI
Core Concepts:	Data Structures & Algorithms, System Design, Multi-tenant Services, Agile, Computer Vision (OpenCV, DeepFace)

WORK EXPERIENCE

.NET Developer — Impiger Technologies, Coimbatore, India

Feb 2025 – Present

Xpert – Tax Computation System

- Engineered a scalable tax computation engine on ASP.NET Core Web API, automating end-to-end tax workflows and eliminating manual calculation errors.
- Designed optimized SQL Server stored procedures for high-volume tax data retrieval, computation logic, and audit-ready report generation, improving query performance and reliability.
- Built secure RESTful APIs with JWT authentication for real-time tax calculation, validation, and seamless front-end integration.
- Mapped complex business tax rules into modular service layers, ensuring regulatory compliance, operational stability, and long-term maintainability.

Employee Performance Management System

- Architected a full-stack, multi-role EMS using ASP.NET Core MVC and Web API for goal setting, 360° performance reviews, KPI tracking, and admin dashboards.
- Implemented JWT-based authentication with cookie storage and role-based access control across Admin, Manager, and Employee roles for multi-level security.
- Designed normalized SQL schema and stored procedures enabling fast dashboard queries, historical trend analysis, and scalable data access.
- Delivered an automated email notification system for review deadlines and approval workflows, reducing manual follow-up and improving process adherence.

Backend Developer Intern — Coreverse Pvt Ltd, Remote

Nov 2024 – Jan 2025

- Built role-based access control (RBAC) on the backend using JavaScript, securing feature access per user role across the platform.
- Integrated Firebase Authentication (Google OAuth) and Firestore for real-time data storage, reducing login friction and improving reliability.
- Developed and tested RESTful API endpoints for frontend modules; contributed in Agile sprints with regular code reviews and technical documentation.

PROJECTS

HRMS Face Recognition Attendance System | FastAPI, OpenCV, DeepFace, RTSP, ANPR, React, WebSockets

- Built a face-recognition attendance system with live RTSP camera ingestion and integrated ANPR (automatic number-plate recognition) for CCTV-based vehicle and attendance tracking, achieving ~80–90% recognition accuracy.
- Designed a real-time React/Vite dashboard streaming base64 JPEG frames over WebSockets, with role-based access for Admin, Manager, and Employee.

Automated LinkedIn Post Generator | Python, Gemini API, Cloudflare Workers AI

- Built an automation pipeline that generates and auto-publishes LinkedIn posts, using Gemini for post copy and Cloudflare Workers AI (Flux) for accompanying images.

A3 Clothing Dashboard | React.js, Node.js, Express.js, MongoDB, JWT, Render

- Built a full-stack MERN e-commerce admin dashboard with real-time inventory tracking, CRUD operations, JWT-based role authentication, and CI/CD deployment on Render.

Instant Chat Application | React.js, Node.js, Firebase, MongoDB, Socket.io

- Developed a real-time messaging platform with Google OAuth login, WebSocket-based live chat, typing indicators, and persistent message history in MongoDB.

EDUCATION

B.Tech, Computer Science and Business Systems — K.S. Rangasamy College of Technology, Tiruchengode

CGPA: 8.0 | Oct 2021 – May 2025

CERTIFICATIONS & ACHIEVEMENTS

- Claude with Google Cloud's Vertex AI (Anthropic) | React.js (Udemy) | Salesforce Developer Cert. | DSA – NPTEL (Elite+Silver)
- Paper Presentation: E-Learning Website with AI Chatbot | Hackathon & AI/DSA Workshop Participant
